Art Unit:

1. Applicant's election with traverse of invention I, claims 17-21 in Paper No. 5 is acknowledged. The traversal is on the ground(s) that there is no serious burden and that the method cannot be practiced by hand. This is not found persuasive because the examiner feels that there is a burden to locate and apply art to all of the claims and that the method can be practiced by hand, which is all that is required in the alternatives of section 806.05(e) of the MPEP.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 1-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in Paper No. 5.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

4. Claims 17-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Stratton et al..
